The present article is the first paper in this collection. SUPPLEMENTARY BIBLIOGRAPHY

Crutchfield, Richard S.; Krech, D.; ... appreciative note by three of Tolman's former students and later colleagues at Berkeley.

The 1922 paper referred to in the present article is the first of a series of papers which to Tolman meant steps in the development of his theoretical system. The 1922 paper referred to in the present article is the first of a series of papers which to Tolman meant steps in the development of his theoretical system. This was the paper in which he first proposed the idea of the cognitive map. The cognitive map is a concept that is central to Tolman's theory of learning. It is a mental representation of the environment that is used to guide behavior. Tolman's theory of learning is based on the idea that organisms learn by forming mental representations of the environment, which are then used to guide behavior. Tolman's theory of learning is based on the idea that organisms learn by forming mental representations of the environment, which are then used to guide behavior.
